DRAFT COMMERCIAL, INDUSTRIAL, AND INSTITUTIONAL (CII) FACILITIES PERMIT

WHAT IS THE CII PERMIT

The Los Angeles Regional Water Quality Control Board (Regional Board) recently released a Draft CII Permit that proposes to regulate stormwater discharges from more than 600 facilities located in the Dominguez Channel/ Greater Los Angeles and Long Beach Harbor Watershed and Los Cerritos Watershed. The Draft CII Permit is being developed in conjunction with USEPA Region 9's use of their Residual Designation Authority to require NPDES Permits for stormwater dischargers not currently defined/regulated under the Clean Water Act. The Draft CII Permit is available for review on the Regional Board's webpage:

CII Permit - Stormwater | Los Angeles Regional Water Quality Control Board (ca.gov)

WHO SHOULD KNOW MORE ABOUT THE CII PERMIT

> Parcels with 5 acres or more of impervious area in the Dominguez Channel/Greater Los Angeles and Long Beach Harbor Watershed and Los Cerritos Watershed
> Unpermitted portions of the California Industrial General Permit (IGP) facilities with 5 or more acres
> Permitted No Exposure Certification (NEC) facilities with 5 acres or more of impervious area
> Other potentially affected facilities include:
  - warehouses
  - car dealerships
  - shopping centers
  - office complexes
  - parking lots
  - private schools

IMPORTANT DATES

October 24, 2022: Comments on the Draft CII are due to the Regional Board
December 8, 2022: The Regional Board will hold a public hearing on the draft CII Permit

GSI WEBINAR INFORMATION

GSI is hosting a 1-hour webinar for aerospace related industries and other interested parties to provide information regarding the proposed CII Permit's regulatory requirements including numeric limitations, compliance options, and compliance dates. This webinar will provide an opportunity to learn more about potential impacts to your facility, ask questions, and identify the next steps you may want to take related to the proposed CII Permit.
